QSE Website

Get Started and Pricing

- Users will first land on our qse.group website where they can see the Offerings/Feature and Pricing models.
- Page has various conversion points where user can directly go to portal and register for the Free account

Contact Us

- Users can directly contact us from our contact us page at <https://www.qse.group/contact-us>
- Users can also email to us at info@qse.group.

Contact us!

Have questions or need assistance?
Feel free to reach out to us, and we'll get back to you as soon as possible.

Quantum Resilient Decentralised Cloud Storage

Create Account

1. Go to <https://portal.qse.group/registration>
2. Fill the form and hit create account (2 account options - private or corporate)

The image shows a registration form for QSE Group on a dark background. At the top is the QSE Group logo. Below it, the text reads "WELCOME TO THE QSE GROUP PLATFORM!" and "PLEASE ENTER YOUR DETAILS TO CREATE AN ACCOUNT:". There are two radio buttons for "Individual Account" (selected) and "Corporate Account". Below this is a section "Enter your Email Address:" with an email input field containing "demo@scopetech.ai" and a referral code input field labeled "Your referral code (optional)". The next section is "Set and Confirm your Login Password:" with two password input fields. Below that is "Select your country of residence:" with a dropdown menu showing "Canada". At the bottom, there is a checked checkbox for "BY CONTINUING, YOU ACCEPT AND AGREE TO THE TERMS AND CONDITIONS." and a blue "Create Account" button.

QSE GROUP

WELCOME TO THE QSE GROUP PLATFORM!

PLEASE ENTER YOUR DETAILS TO CREATE AN ACCOUNT:

☒ Individual Account ☐ Corporate Account

Enter your Email Address:

Set and Confirm your Login Password:

Select your country of residence:

☒ BY CONTINUING, YOU ACCEPT AND AGREE TO THE TERMS AND CONDITIONS.

Create Account

Landing page dashboard

Note: If it's not the same for you contact us at nfo@scopetech.ai

3. Click on **“Secure and Encrypt Account”** to proceed with completing account creation requirements.

4. Fill in the profile information

The screenshot displays the 'ACCOUNT PROFILE DATA' section of the QSE GROUP Account setup. The left sidebar shows the user's profile information and account status. The main content area is titled 'Welcome to your new QSE GROUP Account' and includes a progress indicator with three steps: 1. Complete Profile Data, 2. Enable Master Password, and 3. Activate Multi-Factor. The first step is currently active. Below the progress indicator, there is a section titled 'COMPLETE YOUR PROFILE DETAILS:' with a form for entering the user's first and last name.

ACCOUNT PROFILE DATA

Welcome to your new QSE GROUP Account

In just a few small steps you'll have full access to your account and all of its functionalities!

1 **2** **3**

Complete Profile Data
Your profile details are important when using advanced platform features involving banks and cards.

Enable Master Password
Your Master Password secures your assets and ensures you'll never be locked out of your account.

Activate Multi-Factor
Having multiple ways to authenticate is a core-concept of the platform. Many features require MFA.

COMPLETE YOUR PROFILE DETAILS:

WE'RE LEGALLY REQUIRED TO ASK YOU FOR A FEW PERSONAL DETAILS FOR COMPLIANCE REASONS. YOU WILL ONLY BE ASKED FOR THIS INFORMATION ONCE DURING ACCOUNT SETUP.

Enter your First and Last Name:

Your First Name Your Last Name

5. Fill in the Master Password: It will work as main password recovery

The screenshot displays the 'ACCOUNT PROFILE DATA' section of the QSE GROUP Account setup. The left sidebar shows the user's profile information and account status. The main content area is titled 'Welcome to your new QSE GROUP Account' and includes a progress indicator with three steps: 1. Complete Profile Data, 2. Enable Master Password, and 3. Activate Multi-Factor. The second step is currently active. Below the progress indicator, there is a section titled 'COMPLETE YOUR PROFILE DETAILS:' with a form for entering the user's first and last name.

CONTACT INFORMATION

1

Complete Profile Data

Your profile details are important when using advanced platform features involving banks and cards.

2

Enable Master Password

Your Master Password secures your assets and ensures you'll never be locked out of your account.

3

Activate Multi-Factor

Having multiple ways to authenticate is a core-concept of the platform. Many features require MFA.

ACTIVATE MULTI-FACTOR AUTHENTICATION:

Multi-Factor Authentication secures your account with an additional PIN. WHEN ENABLED, YOU WILL BE ASKED TO ENTER A TIME-BASED 6-DIGIT PIN WHEN WITHDRAWING FROM YOUR ACCOUNT. THIS NUMBER CHANGES EVERY 30 SECONDS AND PROVIDES AN EXTRA LAYER OF SECURITY FOR YOUR ACCOUNT.

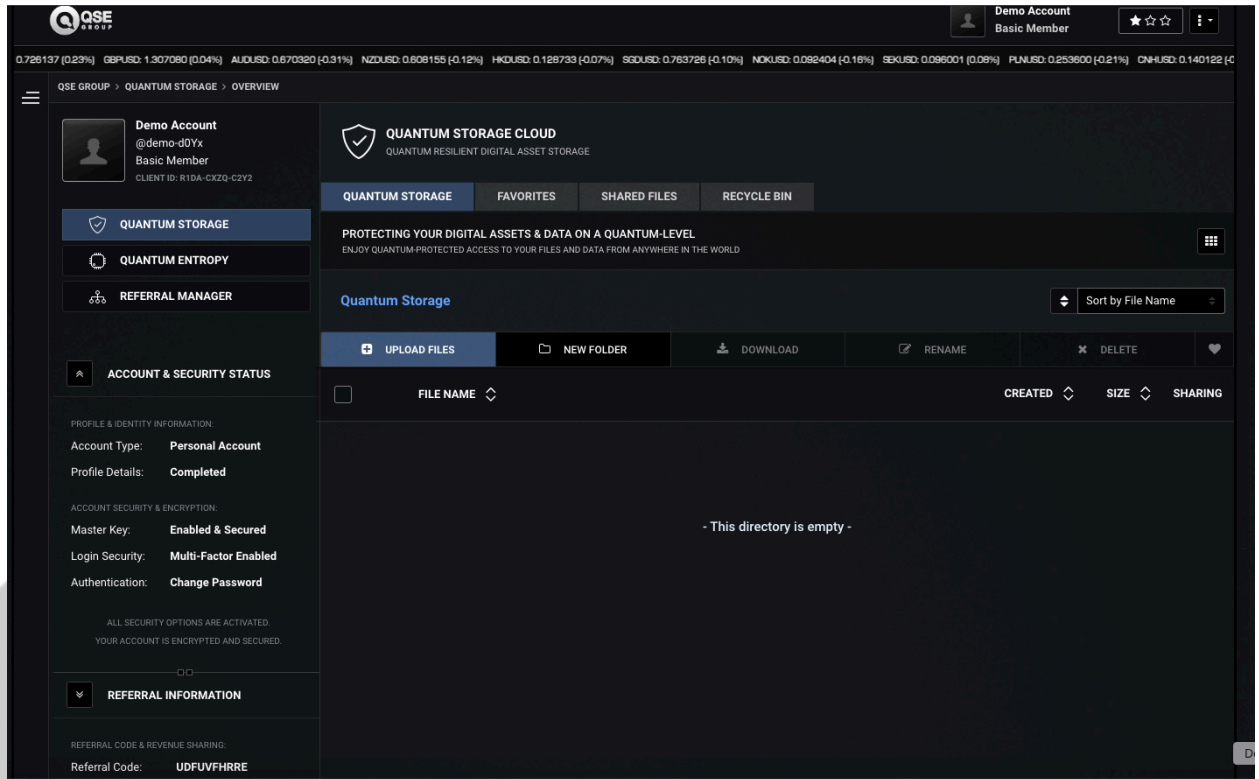

Quick Setup Instructions:

- PLEASE DOWNLOAD AND OPEN "GOOGLE AUTHENTICATOR" FROM THE MOBILE APP STORE.
- CLICK THE (+) TO SCAN THE QR-CODE OR MANUALLY ENTER THE SETUP-KEY BELOW.
- IN GOOGLE-AUTHENTICATOR: SET ACCOUNT NAME AS "QSE GROUP ACCOUNT".
- SELECT TIME-BASED AS TYPE OF KEY AND CONFIRM TO SAVE.
- CONFIRM THE DISPLAYED PIN IN THE FIELD BELOW, THEN CLICK 'ENABLE MULTI-FACTOR'.

Setup Key: 4EAGMBJN00IPW0ULPQM0AMCPNSJZ7PEZ

7. Once, all steps are completed, you will see the following screen

Upload Files

1. Click on upload files and you will see a pop of box, here you can browse or drag & drop your files.

- The image shows a dark-themed application window titled "UPLOAD FILES TO YOUR QUANTUM STORAGE VAULT" with a close button (X) in the top right corner. Below the title bar, the text "SECURELY UPLOAD DOCUMENTS AND FILES" is displayed, followed by a subtitle: "YOU CAN OPTIONALLY SELECT A CUSTOM ENCRYPTION KEY BELOW." There is a search icon and a dropdown menu showing "- Use Default RSA-Key for Encryption -" with a right-pointing arrow. To the right of the dropdown is a file icon. The main area is a large dashed rectangle containing a graphic with the text "QUANTUM STORAGE UPLOAD" and a shield icon with a checkmark. Below the graphic, it says "Drag & Drop-file and folders inside the dashed region or select files below." and a blue button labeled "Select files to encrypt and upload." At the bottom of the window, it states "SUPPORTED FILE TYPES: ALL - MAXIMUM FILE SIZE: 250 MB." and a "Cancel / Close" button.

- [illegible]

- © ScopeTechnologies Corp

Create Folders

1. On the overview page, click on 'New Folder', this will open up a dialog box where you can enter the folder name to create a new folder.

Delete Files

1. Select the file/folder in the main storage page and then click on 'Delete' button on left hand side and then click on 'Move items to the Recycle bin'

Go Back to the Dashboard

1. Click on the 'QSE Logo' button to go back to the dashboard/Quantum Storage page

Quantum Entropy as a Service

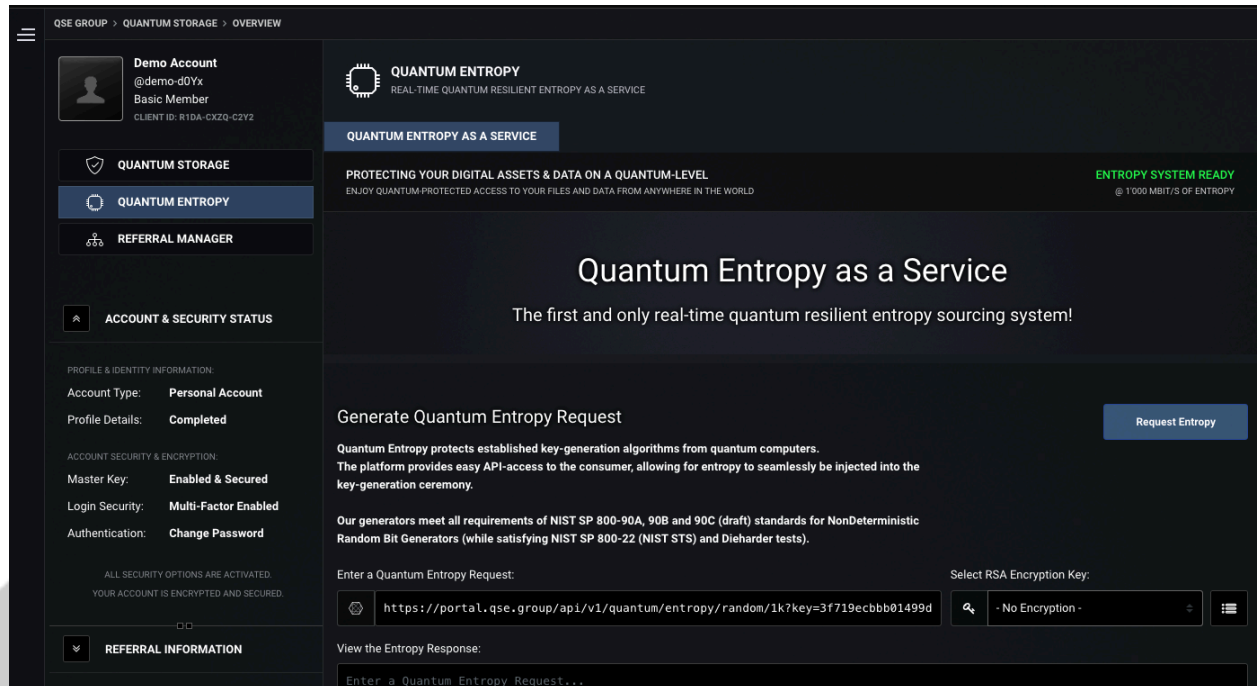

Use cases

Quantum-resilient entropy can be used in various use cases, including:

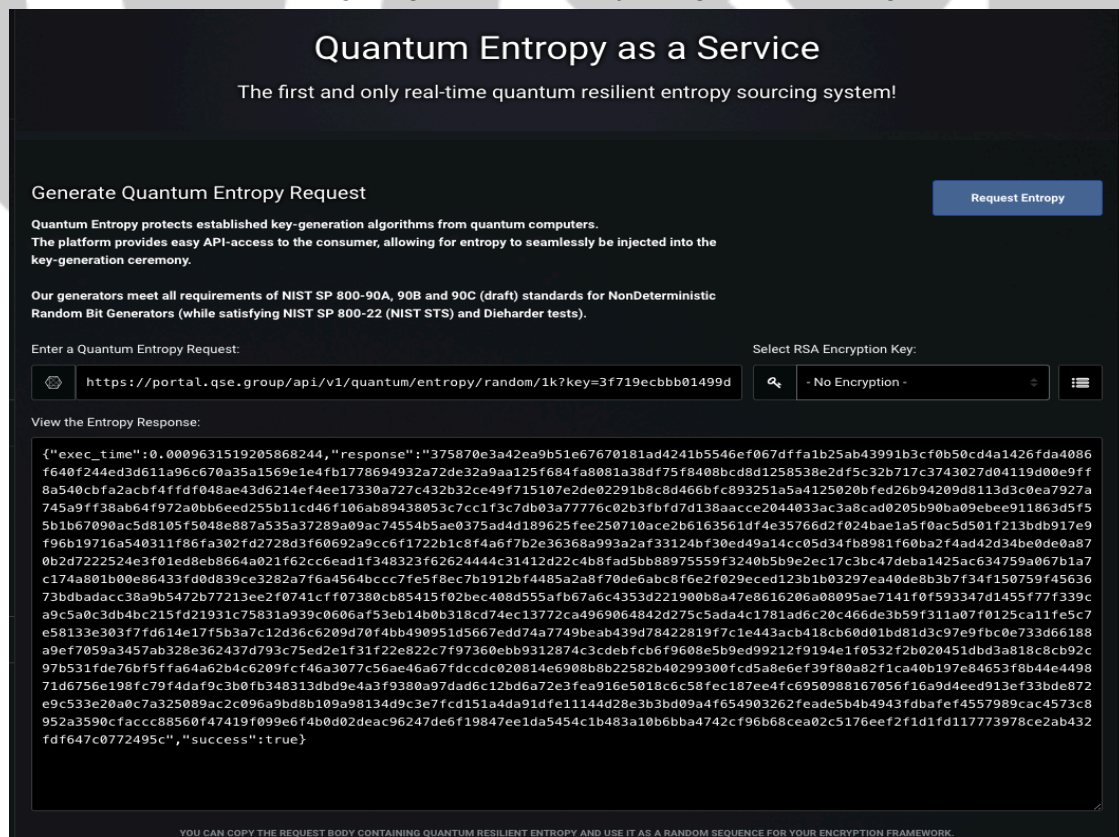

1. **Cryptographic Key Generation:** Ensuring that keys are resistant to quantum-based brute-force attacks by providing highly unpredictable entropy.
2. **Blockchain and Distributed Ledger Technologies:** Enhancing the security of decentralized systems by generating quantum-resilient randomness for consensus algorithms and cryptographic operations.
3. **Secure Communications:** Protecting communication channels (e.g., VPNs, SSL/TLS) by generating encryption keys that withstand quantum decryption techniques.
4. **Random Number Generation (RNG):** In applications like lotteries, simulations, and secure token generation, where truly random and quantum-resistant values are required.
5. **Post-Quantum Cryptographic Schemes:** Ensuring secure generation of keys and parameters for algorithms specifically designed to resist quantum attacks, such as lattice-based cryptography.
6. **Digital Signatures:** Generating quantum-resilient randomness for digital signatures, ensuring that signatures cannot be forged with quantum computers.
7. **Secure IoT Devices:** Safeguarding the randomness in IoT devices, particularly those using lightweight cryptography, against future quantum threats.

Generate Quantum Resilient Entropy

1. Go to the 'Quantum Entropy' page from left sidebar

2. To Request Entropy, there are 2 ways, one without using personal RSA keys and second way by using your personal RSA Keys.
3. Click on 'Request Entropy' to generate Entropy using default settings

```

```

4. To add your RSA keys, click on the drop down menu button (3 vertical bars)

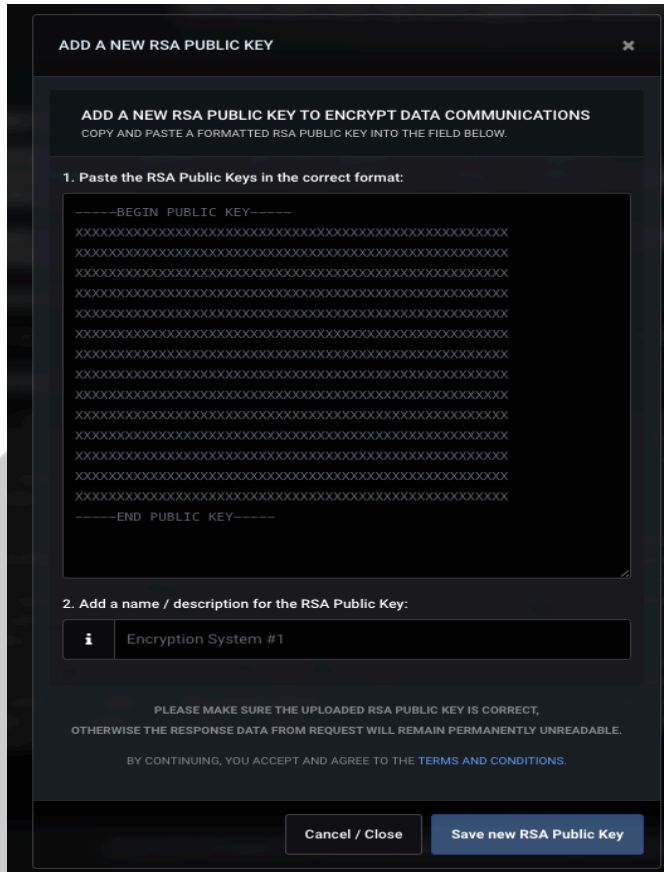

5. In the pop up window click on the 'Add RSA Keys'

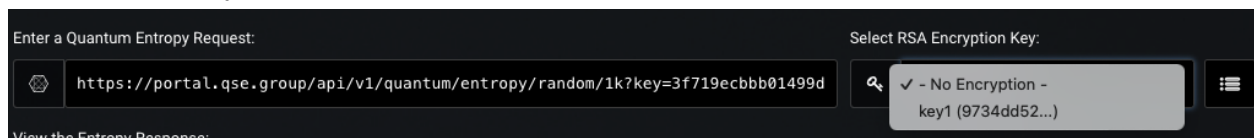

6. In the text box, copy and paste the RSA keys
7. To generate the RSA keys,
 - a. For MAC/Linux : Go to the terminal and write "**ssh-keygen -b 2048**", hit enter and it will generate the id_rsa (private key) and id_rsa.pub (public key) in the root directory inside the hidden folder '.ssh'
 - b. For Windows:
 1. Download and install PuTTY.
 2. Run the puttygen.exe executable.
 3. Go to "Key" > "Generate Public/Private Key Pair...".
 4. Choose "RSA" as the key type and select the desired size (e.g., 2048 bits).

5. Click "Generate" to create the keys.

Alternatively, you can use the ssh-keygen command from Git Bash or Windows Subsystem for Linux:

8. Select the RSA key you added and then hit 'Request Entropy' to generate the entropy with additional security.

1. Hit the 'Request Noise' button to generate Noise
